

# PRATIK ACHARYA

## BSC.CHEMISTRY RUNNING(3RD)

I am Pratik Acharya, an experienced tutor specializing in Chemistry and Biology for +2 students as tuition. Over the years, I have guided many students in building a strong foundation in science through clear explanations and practical learning approaches. My principle in teaching is "Learning by Understanding"—I believe true knowledge comes when students can connect concepts with real-life examples. From simplifying complex theories to solving practical problems, I focus on making science both engaging and effective for learners. With my experience, patience, and passion for teaching, I am confident in my ability to teach and inspire students up to grade 10 in their academic journey.
